Technical skills

Tools & AI

Education

- Master in Computer Science, Epitech** 2015 - 2018
Paris, France
- Mathematics / Computer Science, Bachelor** 2013 - 2015
Aix-Marseille Université, France

Trainings & certifications

- Certification PSM I (Professional Scrum Master I)** Nov 2018
Score : 98.8% - Scrum.org

Profile

Software developer and founder of IMinaIT with 9+ years of experience spanning full-stack web development, system architecture, and product design. I own projects end-to-end: from scoping and technical architecture to UX/UI and delivery, integrating AI tools throughout my workflow to build smarter and ship faster. I have a strong design sensibility, bridging complex systems and intuitive, polished interfaces. I am especially drawn to projects at **the intersection of technology and the arts**: research environments, cultural institutions, creative production, and experimental media.

Experience

Freelance - Lead Software Engineer & System Architect | Design Academy Eindhoven Jun 2024 - Present

Main technologies: Node.js, Next.js, SQLite, WebSocket, Figma, TypeScript

- End-to-end ownership of XR-IT, a real-time distributed platform connecting XR environments: game engines, motion-capture systems, and AV streaming.
- Designed the full system architecture: Node.js orchestrator, distributed clients, Next.js front-end, SQLite, WebSocket & REST APIs, RBAC, and VPN.
- Handled UX/UI design of the management interface; packaged the ecosystem as Windows applications.
- Supported engineers through solution design and code reviews.

Freelance - Senior Frontend Developer | UbiOps Jan 2025 - Dec 2025

Main technologies: React, Vite, Bun, LogQL, Cucumber, Puppeteer, MUI

- Sole front-end developer on an AI/LLM model-serving platform (SaaS + on-premise).
- Led a full redesign of the logging experience around LogQL: syntax-highlighted search, real-time validation, and bi-directional pagination.
- Migrated the toolchain from Webpack/npm to Bun + Vite; stabilised CI/CD pipeline and repaired Cucumber + Puppeteer test suites.

Freelance - Web Developer | Studio Alloy May 2024 - Present

Main technologies: WordPress, PHP, GSAP, JavaScript

- Building a reusable event registration system deployed across multiple websites: waiting lists, multi-role automated and custom email notifications (students, teachers, venues), attendance tracking, and a cross-event reporting tool.
- Implemented other custom features including a secure link-sharing system with expiring tokens and access tracking, and scroll-based animations with GSAP.

Freelance - Lead Software Engineer & Technical Advisor | Animax Jun 2021 - Present

Main technologies: Vue.js, Firebase, JavaScript, PWA, Node.js

- Hybrid physical-digital mobile game for children about endangered animals, linking physical collectible tokens to a digital experience via unique QR codes.
- Involved from ideation: built the Vue.js PWA with a vanilla JS mini-game, designed the full backend (token uniqueness, ownership, social features, player progression), manage all DevOps, and serve as ongoing technical advisor to the project creator.

Freelance - Software Developer | IMinaIT Jun 2021 - Present

Main technologies: React, NextJS, Vue 3, Firebase, TypeScript, Tailwind, Vite, Figma

- Led front-end architecture for an SSR Vue 2 app enhancing a national tennis platform.
- React PWA quiz game, social media campaign automation platform, and car rental app maintenance.

Lead Front-end Developer | UbiOps Sep 2019 - Jun 2021

Main technologies: React, Redux, MUI, Docker, GitLab CI, Kubernetes, GCloud

- Single-handedly built the UbiOps web interface from scratch in 6 months using React, Redux, and MUI, translating a partially developed API into a full product.
- Owned product direction and UX decisions in collaboration with the backend team; recruited and mentored two junior developers.

Front-end Developer | Saegus Apr 2018 - May 2019

Main technologies: React, Angular, Node.js, Vue, Bootstrap, Webpack

Built 2 Angular apps for a data science department; led a React component system for an energy company; enhanced a gamification training app.

Junior Developer | Monsieur Biz Sep 2016 - Mar 2018

Main technologies: Magento, Symfony, PHP, React, Docker, CircleCI, jQuery

Built a full-stack article/event platform from scratch; maintained Magento e-commerce sites.
