Score : 98.8% - Scrum.org

Profile

With over 8 years in web development, I'm a front-end specialist who loves building projects from scratch. I've mastered JavaScript, specialising in React & Vue.js, with a keen eye for detail and a knack for fixing bugs. I'm passionate about creating smooth, innovative UX that meets business goals and I strongly believe collaboration is key to growing both individually & as a team.

Experience

Freelance Front-end developer, IMinaIT

Jun 2021 - Present

Main technologies: React, NextJS, Vue, GitHub CI, Firebase, JQuery, Vite, Figma, Typescript, Tailwind

- Developing a mobile-first Progressive Web App (PWA) using Vue3 and Firebase, featuring a complex, performance-optimized children's game.
- Served as the sole front-end developer for an SSR Vue2 app, collaborating with backend developers and designers to enhance a national tennis platform.
- Contributed to the enhancement of a social media campaign automation platform, working within a development team using Jira and Figma.
- Sole front-end developer responsible for maintaining and improving a car rental app, utilizing Jira & Figma.
- Developed a React-based PWA quiz game in partnership with a back-end developer.

Lead Front-end developer, UbiOps

Sep 2019 - Jun 2021

Main technologies: React, Redux, MUI, Docker, Gitlab CI, Kubernetes, GCloud

- Single-handedly developed the UbiOps platform's web interface in six months using React, Redux & MUI, while collaborating with the BE team for continuous enhancements.
- Demonstrated leadership by recruiting and managing two junior developers.

Front-end developer, Saegus

Apr 2018 - May 2019

Main technologies: React, Angular, NodeJS, Vue, Bootstrap, Zeplin, Webpack

- Developed 2 Angular web apps —a dataset labeling tool & a models showroom— in collaboration with a data engineer and a UX/UI designer.
- Led an energy company project, creating a React landing page generator with reusable components.
- Enhanced a gamification-based React app for employee training and evaluation.

Fullstack web developer, Monsieur Biz

Sep 2016 - Mar 2018

Main technologies: Magento, Symfony, PHP, React, Docker, CircleCI, JQuery

- Maintained and developed various e-commerce websites, and built an e-commerce website and several apps from scratch using agile methodology.

Education

Master in Computer Science, Epitech

Sep 2015 - Sep 2018

Paris, France

Mathematics / Computer science, Bachelor

Sep 2013 - Sep 2015

Faculté Saint-Charles, Marseille, France
